

Electric Knife Sharpener

Manual

Art.No.-38932

Parts

- A. Coarse sharpening "V" groove
- B. Coarse sharpening "V" groove
- C. Fine sharpening "V" groove
- D. Fine sharpening "V" groove
- E. Screwdriver sharpening hole
- F. Scissors sharpening groove
- G. Switch
- H. Feet
- I. Base
- J. Button of cord
- K. Cord

Use and Care

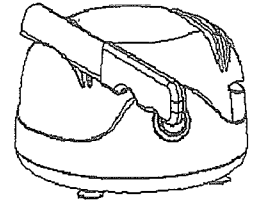

Before using for the first time

- 1) A. As you unwrap the product, make sure you remove all packaging materials. Wipe parts clean with a damp towel. Familiarize yourself with each part.
- B. Do not add water when sharpening knife, scissors, and screwdriver, otherwise will cause the risk of electric shock.

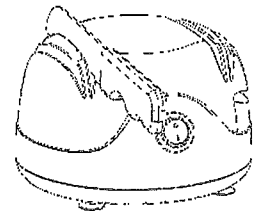

2) How to sharpen the knife:

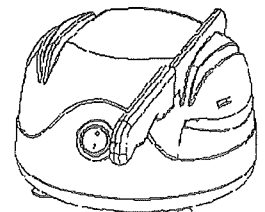

- Place the appliance on a stable surface. Pull out the cord and plug in with the outlet.
 - Press the switch, motor will drive the grinding wheel running up.
 - Hold the shank and put the edge to the "V" groove, pull out the knife at even speed until the edge reach the bottom of the groove, repeat sharpening 3-4 times. (Put the edge as close to the front as possible, then the whole edge can be sharpened)
 - "V" groove in picture 1-2 are coarse sharpening, picture 3-4 are fine sharpening. Picture 1 and 3 for sharpening the right edge, picture 2 and 4 for sharpening the left edge.
 - You can choose coarse or fine sharpening according to the sharpness of the edge, can coarse-sharpen and then fine-sharpen if the edge is dull. This will shorten the time and the appliance will have long service life; You only need to fine-sharpen if the edge is not very dull.
- Attention: When the knife block the grinding wheel and the wheel do not run, must take out the knife and do not sharpen the knife until the appliance run normally, otherwise it will damaged easily.**
- Turn off the switch and cut the power.
 - Clean the table and the appliance, finish sharpening.
 - Do not run the appliance over 30 seconds each us .If due to the use of more than 30 seconds lead to overheating stop. Do not run again until taking rest for 20 minutes and cooling off after each use.
